PROJECTS

Movie website :

Built a responsive movie website using React.js. Integrated with The Movie Database API to display movie information. Designed user-friendly interfaces with React components and CSS. Added features like search, filters, and favorite lists for better user experience. Optimized the site for fast loading and smooth performance.

Education :

Developed a responsive education website using HTML, CSS, and Bootstrap. Created a clean and professional design with easy navigation. Used Bootstrap components for consistent layout and styling across all devices. Implemented sections for courses, instructors, and contact information.
